

# SECURING THE HYBRID WORKPLACE

Computacenter's Microsoft Security Services

Today's workplace is increasingly dynamic and varied with...

MORE DEVICES

MORE APPLICATIONS

MORE COLLABORATION

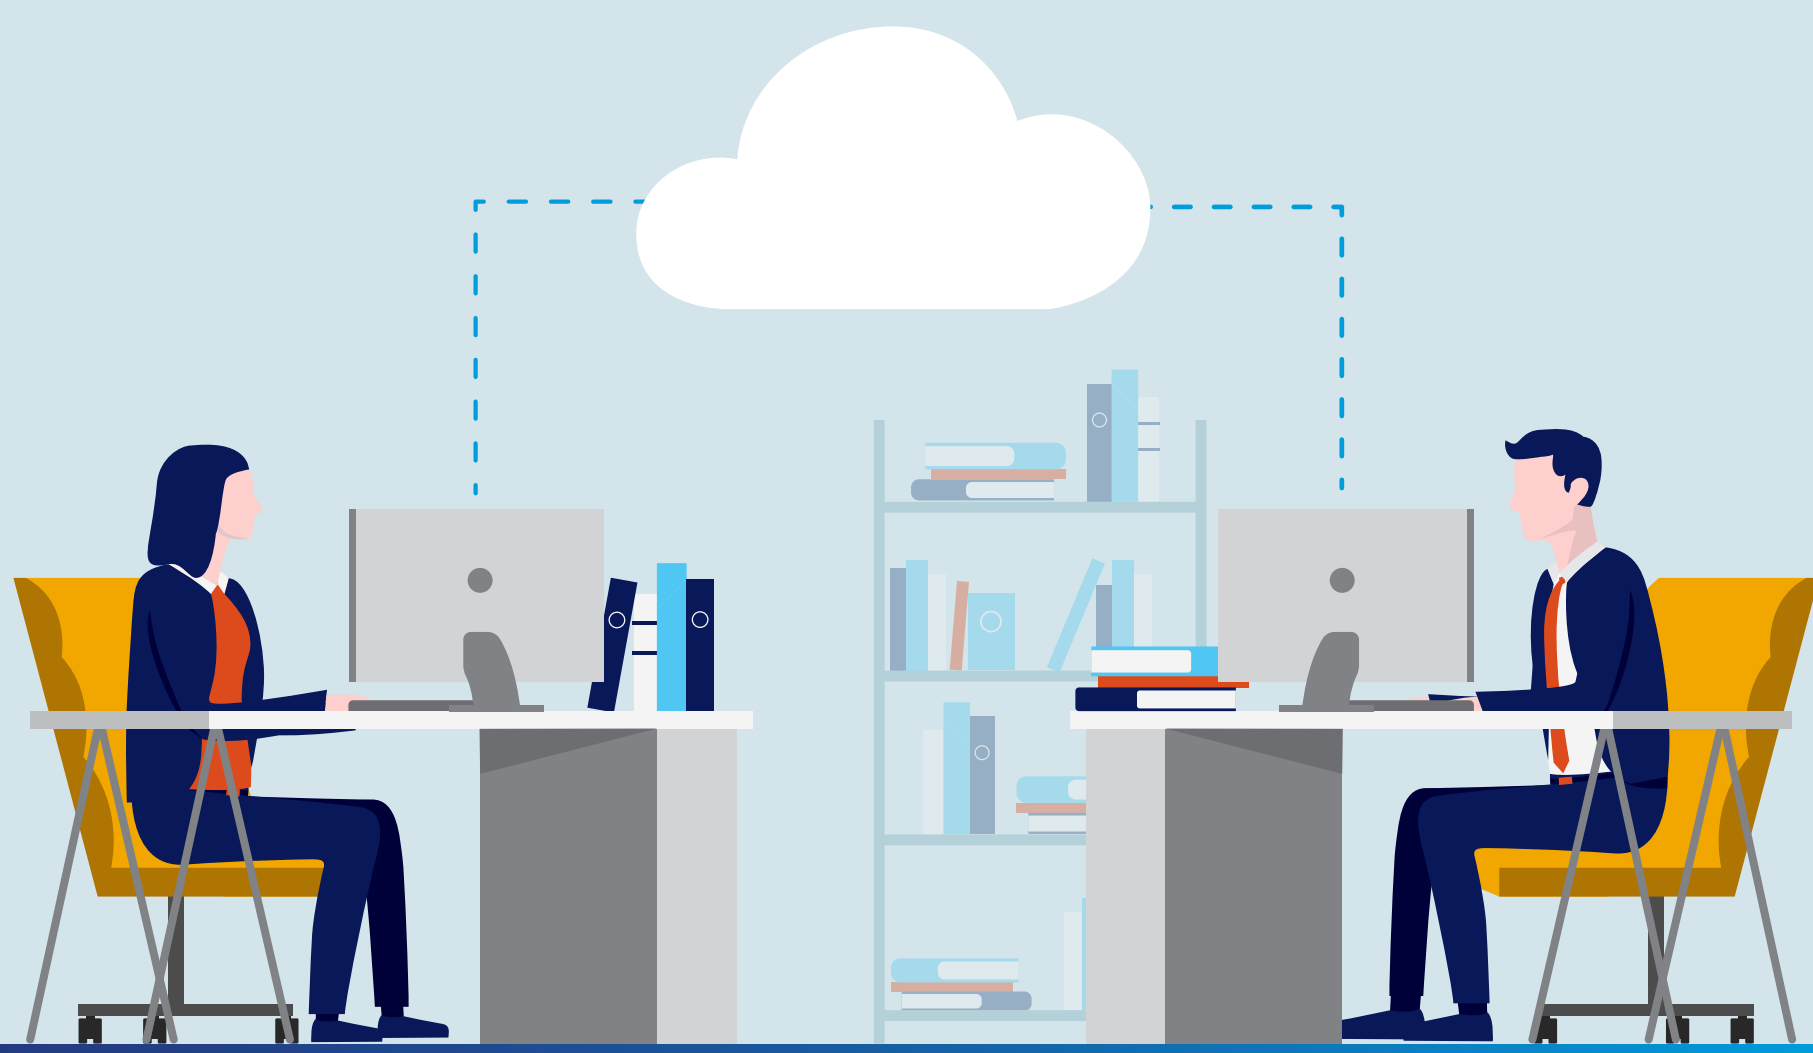

MORE DATA

And now, at a time when hybrid working is becoming the norm for most organisations

With more data being stored in cloud applications...

...and the increasing professionalism of hackers

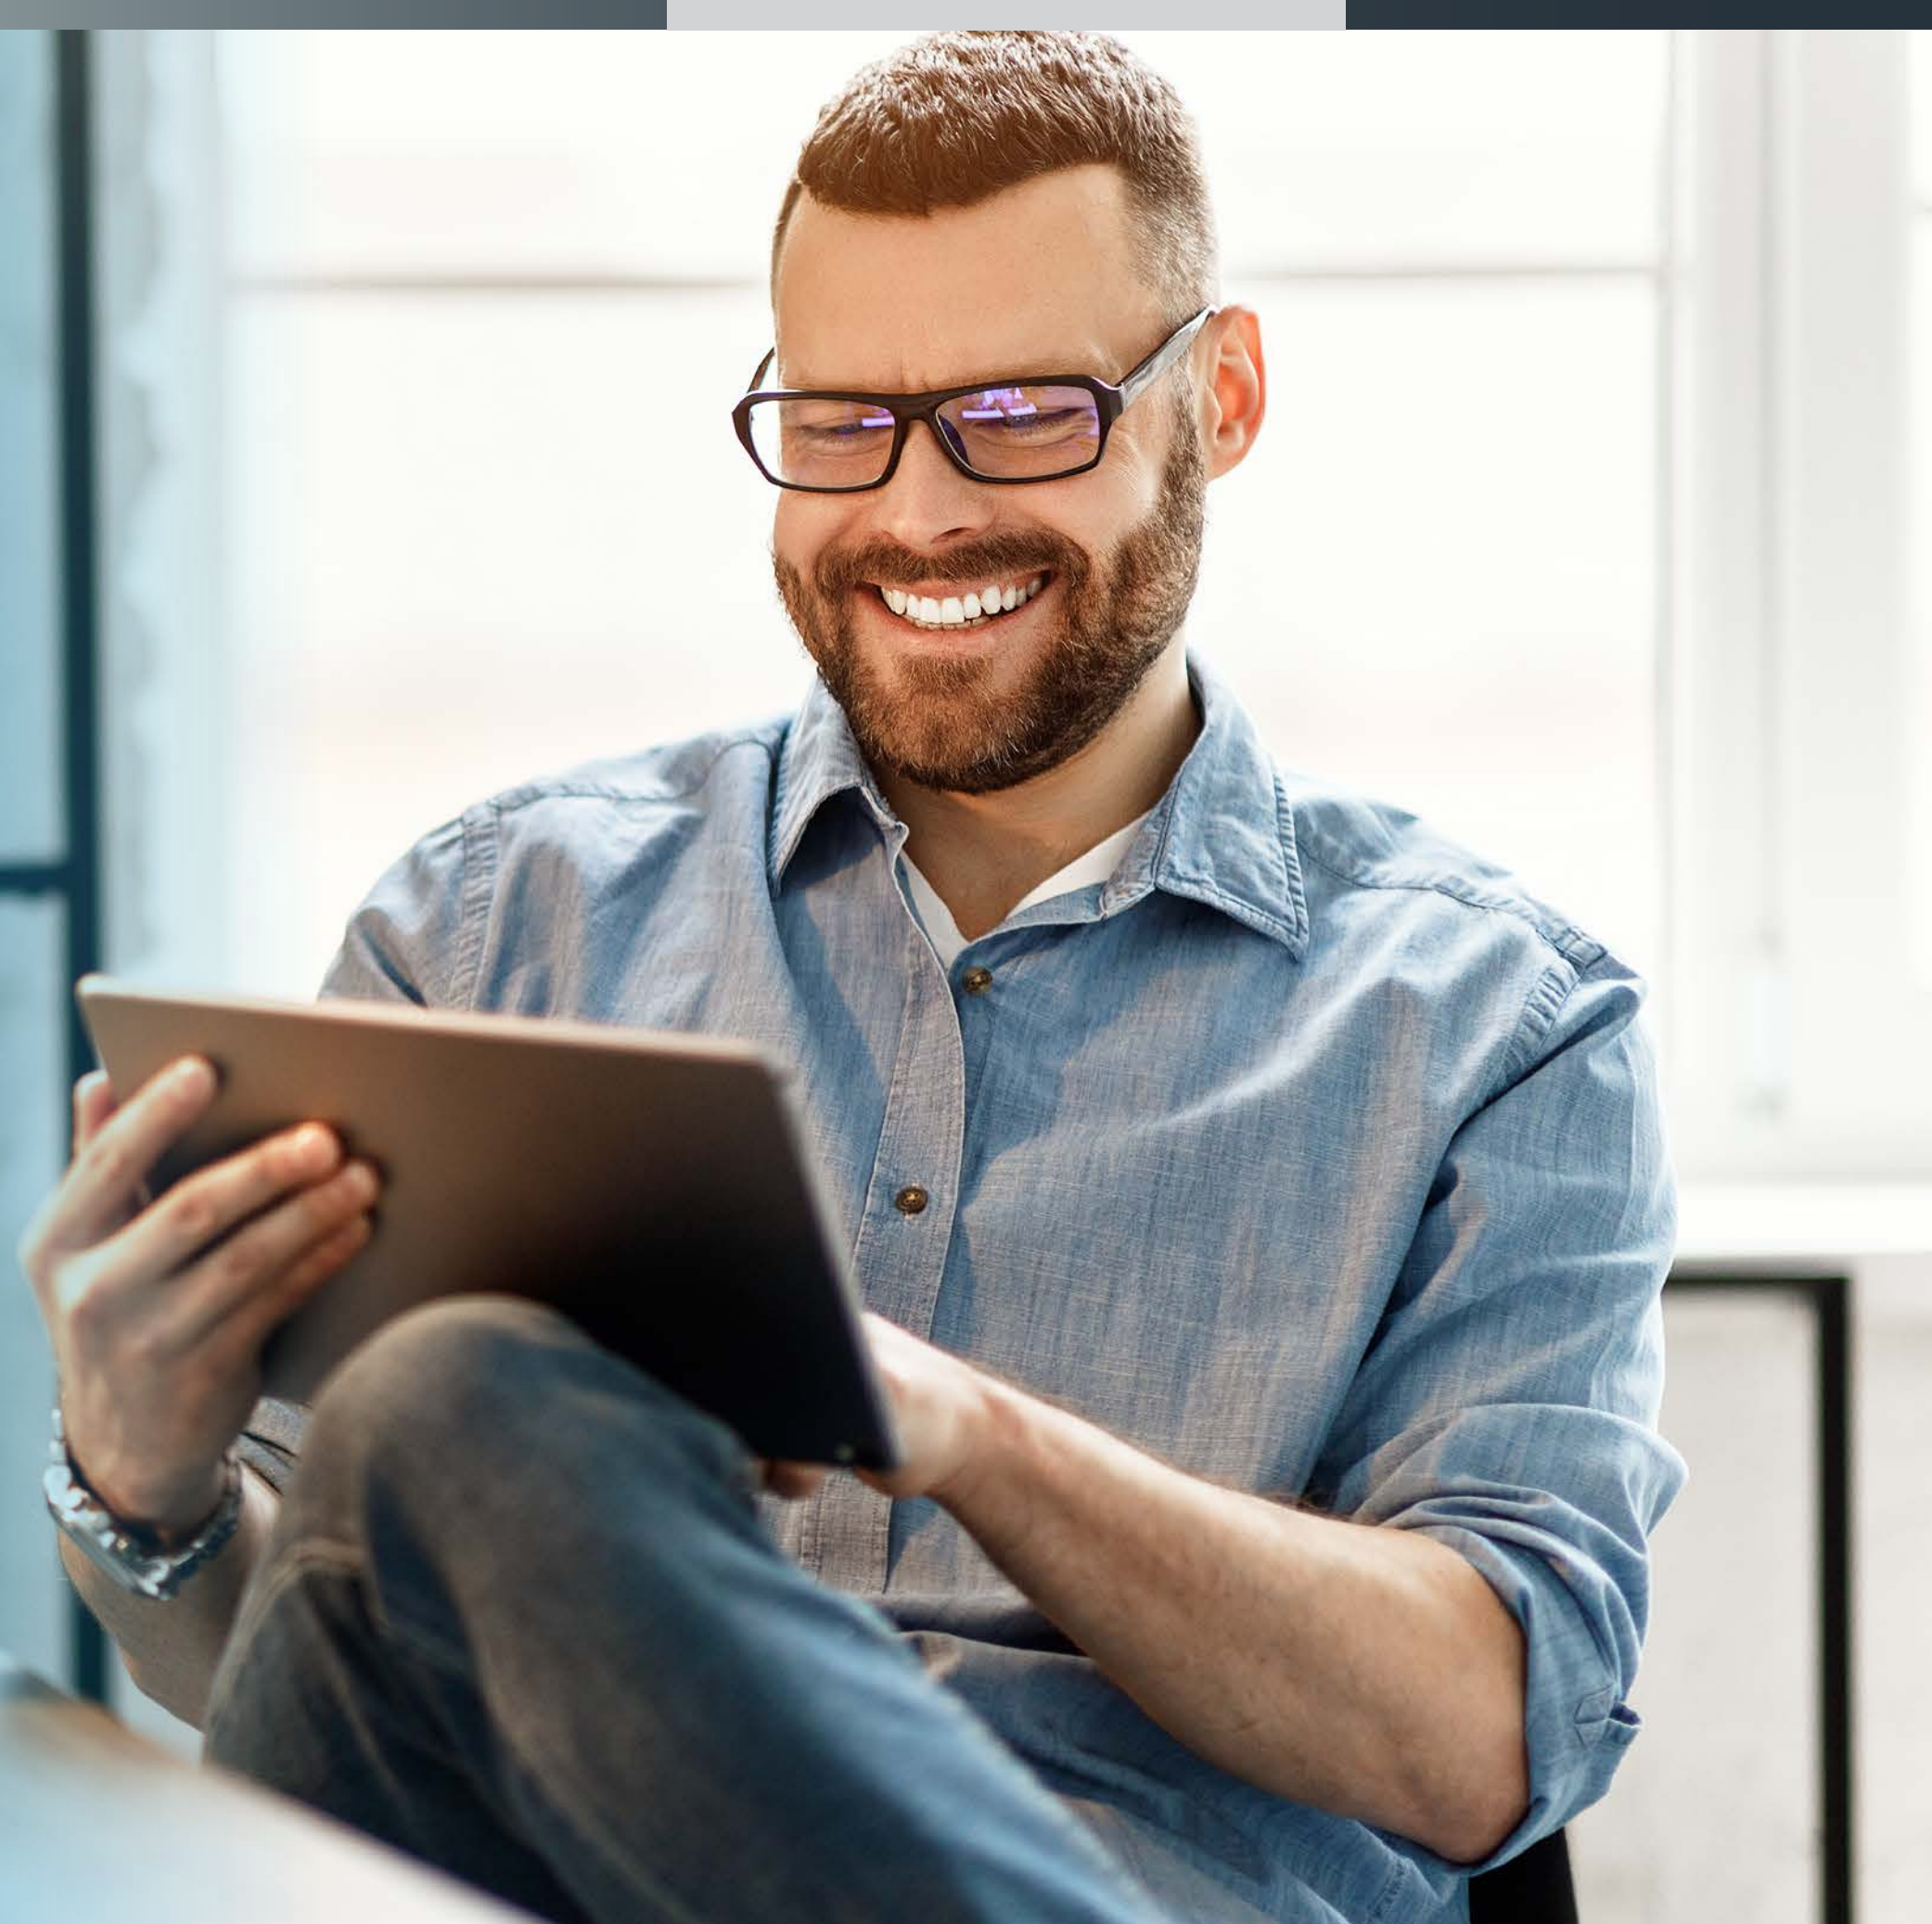

Securing the workplace, its users, its devices and its data is vital

But finding an integrated security solution that covers most bases is difficult

Microsoft provides integrated security solutions that help organisations to safeguard their people, their data and their infrastructure using a single security platform and licensing model.

With Microsoft's comprehensive security offerings, organisations can:

- Protect identities ✓
- Manage access ✓
- Stop threats ✓
- Secure Apps ✓
- Protect data ✓
- Identify/remediate risks ✓

Moving to an integrated platform security model will help:

- Enable rapid response to attacks ✓
- Automate key processes ✓
- Reduce overhead of operating and managing multiple point solutions ✓
- Give more visibility and control to security teams ✓

Computacenter can help optimise your investment in Microsoft Security with a full spectrum of services, including:

Consolidation and License Exploitation

Vendor Assessment

Solution Design & Deployment

Managed Microsoft Security

to:

- ✓ **give clarity** on licensing entitlement and levels of utilisation
- ✓ **advise on** possible areas for consolidation of existing spend
- ✓ **speed up** decision making
- ✓ **free up** internal resources

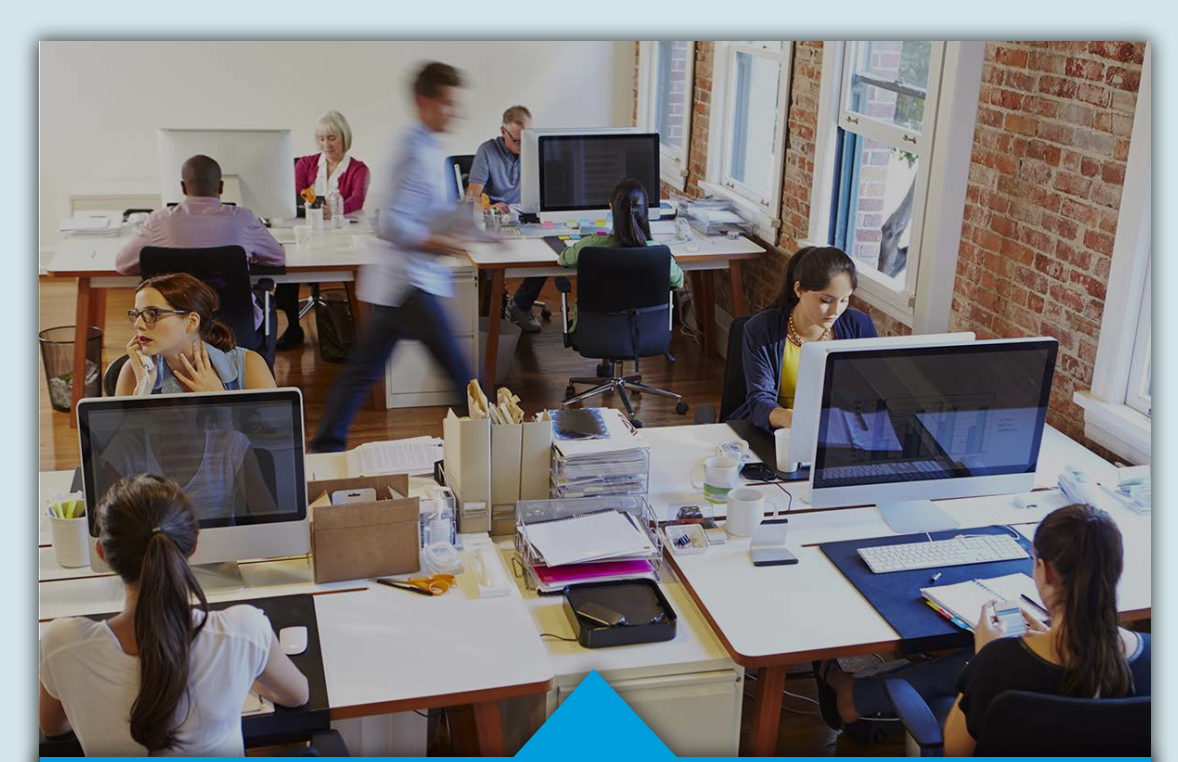

Computacenter and Microsoft, helping to secure...

YOUR EMPLOYEES

YOUR DATA

AND YOUR DIGITAL WORKPLACE
